

MACH4 Label Printer

Made in Germany

Product type overview for MACH4

B with tear-off plate

A minimum label height of 30 mm is required for it to be torn off.

1.1 Printer	MACH4		
Print resolution dpi	203	300	600
Print width up to mm	104	105,6	105,6
Print speed up to mm/s	200	200	100

P with tear-off plate and dispensing function

The label height on dispensing is 20 – 200 mm.

1.2 Printer	MACH4		
Print resolution dpi	203	300	600
Print width up to mm	104	105,6	105,6
Print speed up to mm/s	200	200	100

C with tear-off plate and cutter

Labels or continuous material can be cut at a height of just 12 mm.

1.3 Printer	MACH4		
Print resolution dpi	203	300	600
Print width up to mm	104	105,6	105,6
Print speed up to mm/s	200	200	100

All information on scopes of delivery, design and technical specifications correspond to the date of the printing. Subject to change.

For current data refer to website www.cab.de/en/mach4.

Key features

- MACH4 offers all the features of a high class industrial printer with a wide application range.
- Labels and ribbons can be inserted from the front. The print mechanism and housing are made of premium materials and are perfectly harmonized in their form and function.
- Easy and comfortable handling and high reliability were the requirements during development. The large display with white backlight offers optimum readability.
- The navigation pad with the additional “Enter” button simplifies operation, with only the operated functions being displayed.
- The centered label path eliminates the need for adjustments and avoids wrinkling of the ribbon.
- The high-tech electronic board incorporates all the requisite interfaces as standard and works with all kinds of adapters.

Technical details

- 1 Cover with large window**
Can be opened wide. The integrated cushioning mechanism ensures smooth closing. The label stock is visible at all times.
- 2 Media hub**
The roll is inserted into the media hub and centered automatically. Materials of different widths fit easily within the box.
- 3 Ribbon retainer**
The ribbon can be slid onto a ribbon supply hub with spring mounted brackets. It can be centered with a movable flange and a positioning indicator. The ribbon can be inserted quickly and easily into the print mechanism.
- 4 Print mechanism**
It can be opened at the push of a button and offers easy access.
- 5 Printing with 203, 300 or 600 dpi**
The printheads can switch easily between 203 and 300 dpi. The printer detects the resolution automatically.
- 6 Gap sensor**
To detect the beginning or end of labels, the gap sensor is mounted in the center of the label path. With multi-track labels, the user can switch to another sensor that is shifted 10 mm sideways.
- 7 Label guide**
The adjustment knob can be used to adjust the width of the printing area in order to center the labels.
- 8 Reflex sensor**
The adjustable reflex sensor can be used to identify the start of a label, print marks and cut-outs
- 9 Drive roller**
The drive roller can be easily removed for cleaning or replacement.
- 10 Peel-off plate**
The liner is guided down behind the operation panel. The label is removed from its liner at the peel-off-plate.

Interfaces

- 1 RS232C interface.
- 2 USB 2.0 slave interface.
- 3 Ethernet 10/100 Base T interface with TCP/IP.
- 4 Slot for wireless LAN card.
- 5 Two USB master interfaces for connecting an external operation panel, keyboard, scanner, USB flash drive or service key.
- 6 Slot for CompactFlash Type I memory card.

Options

- 
 - Centronics bi-directional interface acc. to IEEE 1284.
 - RS422/RS485 interface 1,200 to 230,400 Baud/8 Bit. The interfaces are plugged into the PC. Connection to the printer via mini USB connection cable.
- 
 - Label selection – I/O box. Up to 16 different labels can be loaded via PLC from a memory card. Operation of four inputs/outputs via Basic Interpreter.
- 
 - cab WLAN card 802.11 b/g.

Stand-alone operation

Printing without PC

Stand-alone operation is the ability to print labels even if the printer is not connected to the host system. The label layout is designed with the label software cablabel S3 or direct programming via PC. Label formats, fonts, font-, text- and graphics data as well as data base contents are saved on the USB stick or read on the internal data memory IFFS. Only variable data to be printed is sent to the printer via keyboard or scanner.

Technical data

■ Standard □ Optional

Label printer		MACH4		
Print head				
Printing method	Thermal transfer	■	■	■
	Thermal direct	■	■	–
Print resolution	dpi	203	300	600

	core diameter	mm	outside or inside	
Ribbon				
Ink			outside or inside	
Roll diameter up to	mm		72	
Core diameter	mm		25	
Ribbon length up to	m		360	
Width ²⁾ up to	mm		114	
Dimensions				
Height x Depth x Width	mm		312 x 435 x 240	
Weight	kg		6	
Label sensor				
Gap sensor			For label edge or punching mark and end of material centered or shifted 10 mm to the left	
Position				
Reflective sensor from below			For label edge, punching or centered printing mark adjustable 56 mm to the left /10 mm to the right	
Position				
Electronics				
Processor High Speed 32 Bit Coldfire / clock rate MHz			266	
RAM MB			64	
Memory IFFS MB Flash			8	
Slot for CompactFlash Type I memory card			■	
Slot für wireless LAN card			■	
Battery buffer for real-time clock, printout of time and date, data storage on shut-down			■	
Warning signal acoustic signal in case of error			■	
Interfaces				
Centronics bidirectional acc. IEEE 1284			□	
RS232 C 1.200 up to 230.400 Baud / 8 Bit			■	
USB 2.0 full speed Device for PC connection			■	
Ethernet 10/100 Base T, LPD, RawIP-Printing, ftp-Printing, DHCP, HTTP, FTP, SMTP, SNMP, TIME, Zeroconf, mDNS, SOAP			■	
RS422, RS485 1.200 up to 230.400 Baud / 8 Bit			□	
WLAN card 802.11b/g WEP / WPA PSK (TKIP)			□	
2 x USB Host for external operation panel, keyboard, scanner, service key, USB flash drive			■	
Operating data				
Power supply			100 - 240 VAC 50/60 Hz, PFC	
Energy consumption			max. 300 W	
Temperature/Humidity	Operation:		5 - 40°C / 10 - 85% not condensing	
	Stock:		0 - 60°C / 20 - 80% not condensing	
	Transport:		– 25 - 60°C / 20 - 80% not condensing	
Approvals			CE, FCC class A, CB, CCC, UL	

¹⁾ Limitations may apply to small labels, thin materials or strong adhesives. Critical materials or applications must be tested and approved.

²⁾ The ribbon should be roughly the same width as the label in order to avoid folding.

Operation panel	
Buttons/LED display	Pause, Feed, Cancel, Menu, Enter, 4 x Cursor
LCD graphic display	Width 60, Height 40 mm, Text 4 lines, approx. 20 characters per line
Settings	
Digital or analog clock	Time
System settings	Date
Print parameters	Interfaces
25 language settings	Security
On the Display	
Data reception	Clock
WLAN field intensity	Date sheet
Ethernet status	abc Debug
Used memory	Input buffer
Temperature printhead	Remaining ribbon
Access to memory card	
Monitoring	
Stop printing if	End of ribbon End of labels Printhead open Final position not reached
Test routines	
System diagnosis	When switched on, including printhead testing
Short status, status print	Font list, device list, WLAN Status, label profile, test grid, monitor mode, PPP status
Status reports	Status printout with information about settings, e.g. print length counter, runtime counter, etc. Request of status via software command. Status messages on the display, e.g. network error - no link, barcode error, etc.
Fonts	
Font types	5 Bitmap fonts, incl. OCR-A, OCR-B and 3 Vector Fonts Swiss 721, Swiss 721 Bold and Monospace 821 internally available, loadable TrueType fonts. Thai and Chinese (simplified Chinese) available as option.
Character sets	Windows 1250 up to 1257, DOS 437, 737, 775, 850, 852, 857, 862, 864, 866, 869, EBC DIC 500, ISO 8859-1 up to -10 and -13 up to -16, WinOEM 720, UTF-8, Macintosh Roman, DEC MCS, K018-R. All West and East European Latin, Cyrillic, Greek, Hebrew and Arabic characters are supported. Thai and Chinese available as option.
Bitmap fonts	Size of width and height 1 – 3 mm Zoom 2 – 10 Orientation 0°, 90°, 180°, 270°
Vector- / TrueType fonts	Size of width and height 0,9 – 128 mm Variable zoom, Orientation 360° in steps of 1°
Font formats	Bold, italic, underlined, outline, inverse, depending on character fonts
Font width	Variable

Graphics			
Graphic elements	Line, arrow, box, circle, ellipse, filled and filled with fading		
Graphic formats	PCX, IMG, BMP, TIF, MAC, GIF, PNG		
Barcodes			
Linear barcodes	Code 39, Code 93 Code 39 Full ASCII Code 128 A, B, C EAN 8, 13 EAN / UCC 128 EAN / UPC Appendix 2 EAN / UPC Appendix 5 FIM HIBC	Interleaved 2 / 5 Ident- and lead code of Deutsche Post AG Codabar JAN 8, 13 MSI Plessey Postnet RSS 14 UPC A, E, E0	
2D codes	Aztec, Codablock F, Data Matrix, PDF 417, Micro PDF 417, UPS Maxicode, QR-Code, RSS 14 truncated, limited, stacked and stacked omnidirectional, EAN-Datamatrix, GS1 Data Bar All codes are variable in height, module width and ratio. Orientation 0°, 90°, 180°, 270°. Optionally with check digit, printed characters and start/stop code depending on type of code.

3.2 	Interface RS422/RS485 1.200 up to 230.00 Baud/8 Bit
3.3 	Label selection box - I/O-Box From a higher-level control, like a PLC, up to 16 different labels can be selected from the memory card.
3.4 	WLAN card 802.11 b/g
Connecting cables	Product
4.1 	Connecting cable RS232 C 9 / 9 pin, length 3 m
4.2 	Patch cable CAT 5e 3 m grey

Operation and compliance with CE standards is only warranted by using materials provided or recommended by cab.

Label software cablabel S3

11.9

cablabel S3 concentrates label design, print control and monitoring of all cab marking systems. The development of devices and software is synchronized.

Highlights

Like no other software available cablabel S3 develops the full potential of cab devices. The software utilizes the JScript code to the full extent. The Pro product imports existing JScript files, so you can switch over easily to new software. With the new layer technology the user designs a label which works for all established devices and resolutions. Intelligent print control evaluates both device and resolution for printout and provides the proper data. Thus, possible sources of error are reduced.

cablabel S3 also maximizes the integration of database connections via Database Connector. After designing the label, the software provides all files to be stored within the printer for database connections. Stand-alone operation independent from a host system is supported. In addition the software creates interfaces which are easy to handle for SAP connection or other devices like PLC, scales and barcode testers.

Functional range

Every company designs and formats their label printing differently. For example, label creation and production are executed by different employees. To adopt the software package to specific needs, cab offers different software packages.

- *cablabel S3 Lite* is offered free of costs with every cab printer and allows to create and print labels.
- With cost-saving *cablabel S3 Pro* label designs for professional technical solutions can be created.
- *cablabel S3 Viewer* shows the preview of a label in the Windows Explorer and - like the Lite product - is delivered free of costs with every cab printer. The Viewer may support showing examples during the approval processes or supplier requirements.
- *cablabel S3 Print* is provided for users in production or warehouse. The user interface is simplified and provides only those functions which are required for label printing.

Other products like cablabel S3 Pro Laser, Print Laser and Print Server are in preparation.

Integration

No printer is isolated – in a productive environment it is connected to other equipment or networks for control and monitoring. cab offers various possibilities to integrate the printer into your environment.

Control

Every cab printer can be directly coded with the simple programming language *JScript* and an extensive instruction set. The label software *cablabel*® S3 supports optimally *JScript*, but a *JScript* program may also be created with any text editor.

As an integrated element of the firmware, the *abc Basic compiler* enables the printer to process data via BASIC programming before it is sent for print editing. That way, you replace external printer languages or integrate data from other systems, e.g. balance or a PLC.

11.4 In the stand-alone mode with additional network connection, the *Database Connector* enables printers to access data directly from a central ODBC-, OLEDB compatible database and to print it as a label.

In cooperation with SAP* cab developed the so-called *replace method* to control cab printers quickly and easily from SAPScript using SAP R/3. Using the replace method the host computer only sends the *JScript* variable, respectively changed data to the printer. As a Silver Level partner in SAP's Printer Vendor Program, cab has access to the SAP development area for optimum printer support in SAP environments.

* SAP and all SAP logos are trademarks or registered trademarks of SAP SE in Germany and in several other countries.

11.10 The *Programmer's guide* explains and describes commands for different printer models via direct programming with *JScript* and *abc* and additionally the connection of the printer to databases via *Database Connector*.

For the printer control via PC accredited drivers are available for established Windows operating systems and additionally CUPS-based drivers for Mac OS X and Linux. The drivers ensure optimal stability on your operating system.

Monitoring

Using standard programs such as the web browser or FTP clients, the integrated HTTP and FTP server enables print monitoring, configuration, firmware updates and memory card administration. Status, warning and error messages are sent to administrators or users as e-mails or SNMP datagrams via SNMP and SMTP clients. A time server is used to synchronize time and date.

11.6 The cab Network Manager enables the user to control a number of printers across a network simultaneously. It supports monitoring, configuration, firmware updates, memory card administration, file synchronization and PIN administration centrally.
