Wichtige Sicherheits-Hinweise

- 1. Bitte lesen Sie diese Hinweis sorgfältig durch.
- 2. Heben Sie diese Anleitung für den späteren Gebrauch auf.
- 3. Vor jedem Reinigen ist das Gerät vom Stromentz zu trennen. Verwenden Sie keine Flüssig-oder Aerosolreiniger. Am besten eignet sich ein angefeuchtetes Tuch zur Reinigung.
- 4. Die Netzanschluß-Steckdose soll nahe dem Gerät angebracht und leicht zugänglich sein.
- 5. Das Gerät ist vor Feuchtigkeit zu schützen.

- 6. Bei der Aufstellung des Gerätes ist auf sicheren Stand zu achten. Ein Kippen oder Fallen könnte Beschädigungen hervorrufen.
- 7. Beachten Sie beim Anschluß ans Stromnetz die Anschlußwerte.
- 8. Dieses Gerät kann bis zu einer Außentemperatur von maximal 40 °C betrieben werden.

CAUTION

Risk of explosion if battery is replaced by an incorrect type.

Dispose of used batteries according to the instructions.

"VORSICHT"

Explosionsgefahr bei unsachgemäßen Austaush der Batterie. Ersatz nur durch denselben oder einem vom Hersteller empfohlenem ähnlichen Typ. Entsorgung gebrauchter Batterien nach Angabren des Herstellers.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

CAUTION

- 1. HAZARDOUS MOVING PARTS IN CUTTER MODULE. KEEP FINGER AND OTHER BODY PARTS AWAY.
- 2. THE MAIN BOARD INCLUDES REAL TIME CLOCK FEATURE HAS LITHIUM BATTERY CR2032 INSTALLED. RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
- 3. DISPOSE OF USED BATTERIES ACCORDING TO THE MANUFACTURER INSTRUCTIONS.

ATTENTION

 PIECES DANGEREUSES EN MOUVEMENT DANS LE MODULE DE COUPAGE. GARDER VOS DOIGTS ET AUTRES PARTIES DU CORPS À L'ÉCART DE CES ZONES.
 LE CIRCUIT PRINCIPAL CONTIENT UNE HORLOGE EN TEMPS RÉEL AVEC UNE BATTERIE AU LITHIUM DE TYPE CR2032. RISQUE D'EXPLOSION SI LA PILE EST REMPLACÉE PAR UNE PILE D'UN AUTRE TYPE.

^{3.} SUIVRE LES INSTRUCTIONS DU FABRICANT POUR LA MISE AU REBUT DES PILES USÉES.

1. Introduction

1.1 Product Introduction

Thank you very much for purchasing TSC bar code printer.

This printer is designed with die-casting aluminum chassis and print mechanism, metal cover with large clear media view window, which ensuring to work for the extreme and heavy duty industrial environment and applications.

With back-lit graphic LCD display, printer status can be managed easier and operated more user friendly. The moveable sensor design can accept wide range of label media. All of the most frequently used bar code formats are included. Fonts and bar codes can be printed in any one of the four directions.

This printer is built-in the high quality, high performance MONOTYPE IMAGING® True Type font engine and one CG Triumvirate Bold Condensed smooth font. With flexible firmware design, user can also download the True Type Font from PC into printer memory for printing labels. Besides the scalable font, it also provides a choice of five different sizes of alphanumeric bitmap font, OCR-A and OCR-B fonts. By integrating rich features, it is the most cost-effective and high performance printer in its class!

- Applications
 - o Industrial-duty printing
 - o Healthcare patient safety
 - o Compliance labeling
 - o Work in process
 - o Order fulfillment
 - o Distribution
 - Shipping/ receiving
 - o Ticketing
 - o Electronics & jewelry labeling

1.2 Product Features

1.2.1 Printer Standard Features

The printer offers the following standard features.

Product standard feature	203 dpi models	300 dpi models
Thermal transfer/ or direct thermal	0	0
High quality die-cast aluminum design	0	0
Metal cover with large clear media view window	0	0
Transmissive gap sensor (position adjustable from 4"~8")	0	0
Reflective black mark sensor position full web adjustable	0	0
Transmissive ribbon end sensor	0	\bigcirc
Ribbon encoder sensor (Support color ribbon)	0	0
Head open sensor	0	0
Resistive Touch Screen, 16 bits Color, 480 x 272 pixels, with back lights	0	0
Control panel with 6 operation buttons	\bigcirc	\bigcirc
LED indicators	0	0
Real time clock	0	0
Internal Ethernet print server (10/100 Mbps) interface	0	0
USB 2.0 client (High speed mode)	0	\bigcirc
Serial RS-232C (2400-115200 bps) interface	0	0
USB host interface, for scanner or PC keyboard	0	0
Centronics (SPP mode)	0	0
256 MB DDR2 SDRAM memory	0	0
512 MB FLASH memory	0	0
SD Flash memory card slot for Flash memory expansion, up to 32GB	0	0
32-bit RISC high performance processor(BGA 536MHz)	0	0
Standard industry emulations right out of the box including Eltron® and Zebra® language support	0	0
Internal 8 alpha-numeric bitmap fonts	0	0
Fonts and bar codes can be printed in any one of the four directions (0, 90,180, 270 degree)	0	0
Internal Monotype Imaging [®] true type font engine with one CG Triumvirate Bold Condensed scalable font	0	0
Downloadable fonts from PC to printer memory	0	0

Bar code, graphics/image p	rinting				
Supported bar code		Supported image			
1D bar code Code128 subsets A.B.C, Code128UCC, EAN128, Interleave 2 of 5, Code 39, Code 93, EAN-13, EAN-8, Codabar, POSTNET, UPC-A, UPC-E, EAN and UPC 2(5) digits, MSI, PLESSEY, China Post, ITF14, EAN14, Code 11, TELPEN, PLANET, Code 49, Deutsche Post Identcode, Deutsche Post Leitcode, LOGMARS	2D bar code CODABLOCK F mode, DataMatrix, Maxicode, PDF- 417, Aztec, MicroPDF417, QR code, RSS Barcode (GS1 Databar)	BITMAP, BMP, PCX (Max. 256 colors graphics)	0	0 0	
Supported code page:					
			0		

1.2.2 Printer Optional Features

The printer offers the following optional features.

Product option feature	User option	Dealer option	Factory option
Applicator I/O interface (GPIO)			\bigcirc
Regular cutter module (full cut guillotine cutter) Max. media width: 215.9mm (8.5") Max. media thickness: 0.12 ~ 0.25 mm Media type: receipt, tag, and label liner w/o glue	0		
Heavy duty cutter module (full cut guillotine cutter) Max. media width: 215.9mm (8.5") Max. media thickness: 0.06 ~ 0.30 mm Media type: receipt, tag, and label liner w/o glue	0		
KP-200 Plus series keyboard	\bigcirc		
KU-007 Plus programmable smart keyboard	0		
Bluetooth module (serial interface)	0		

Note: Except for the linerless cutter, all regular/heavy duty/care label cutters DO NOT cut on media with glue.

1.3 General Specifications

General Specifications		
Physical dimensions	440 mm (W) x 336 mm (H) x 514 mm (D) 17.32" (W) x 13.23" (H) x 19.84" (D)	
Weight 23.7 kg		
Power	Internal switching power supply Input: AC 100-240V, 3.0A, 50-60Hz Output: DC 24V, 8.33A, 200W	
Environmental condition	Operation: 5 ~ 40°C (41 ~ 104°F), 20~85% non-condensing Storage: -40 ~ 60 °C (-40 ~ 140°F), 10~90% non-condensing	
Environmental concern	Comply with RoHS, WEEE	

1.4 Print Specifications

Print Specifications	203 dpi models	300 dpi models
Print head resolution (dots per inch/mm)	203 dots/inch (8 dots/mm)	300 dots/inch (12 dots/mm)
Printing method	Thermal transfer/	or direct thermal
Dot size (width x length)	0.125 x 0.125 mm (1 mm = 8 dots)	0.084 x 0.084 mm (1 mm = 12 dots)
Print speed (inches per second)	Up to 6 ips	Up to 4 ips
Max. print width	216 mm	219.5 mm
Max. print length	11,430 mm (450")	5,080 mm (200")
Printout bias	Vertical: 1 mm max. Horizontal: 1 mm max.	

1.5 Ribbon Specifications

Ribbon Specifications		
Ribbon outside diameter	Max. OD 90 mm	
Ribbon length	600 meter	
Ribbon core inside diameter	1" core (25.4 mm)	
Ribbon width	110 mm ~ 254 mm (4.33"~10")	
Ribbon wound type	Ink coated inside/ outside	
Note: Support color ribbon		

1.6 Media Specifications

Media Specifications	203 dpi models	300 dpi models
Label roll capacity	208.3 mm ((8.2") OD
Media alignment	Center	bias
Media type	Continuous, die-cut, blac	k mark, fan-fold, notch
Media wound type	Printing face ou	utside wound
Media width	101.6~241.3 mm (4" ~ 9.5")	
Media width (cutter mode)	mode) 101.6~215.9 mm (4"~8.5") Cutter max. media width 225mm	
Media thickness	0.06 ~ 0.254 mm (2.36 ~ 10 mil)	
Media core diameter	76.2 mm (3")	
Media length	25.4~1270 mm (1.0"~50")	
Media length (cutter mode)	25.4~1270 mm (1.0"~50")	
Gap height	Min. 2 mm	
Black mark height	Min. 2 mm	
Black mark width	Black mark width Min. 8 mm (0.31")	

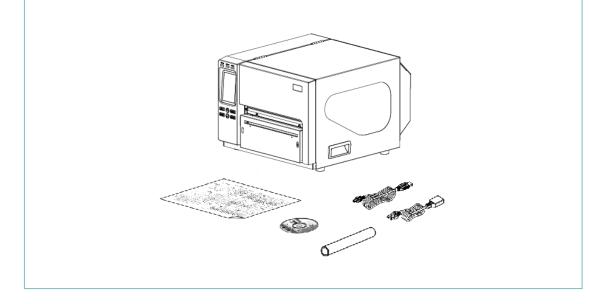

2. Operations Overview

2.1 Unpacking and Inspection

This printer has been specially packaged to withstand damage during shipping. Please carefully inspect the packaging and printer upon receiving the bar code printer. Please retain the packaging materials in case you need to reship the printer. (Please refer to the <u>section 9 for repacking Instructions</u>.) Unpacking the printer, the following items are included in the carton.

- One Windows labeling software/Windows driver CD disk
- One quick installation guide
- One power cord
- One USB interface cable
- One paper core (for ribbon rewind)

If any parts are missing, please contact the Customer Service Department of your purchased reseller or distributor.

2.2 Printer Overview

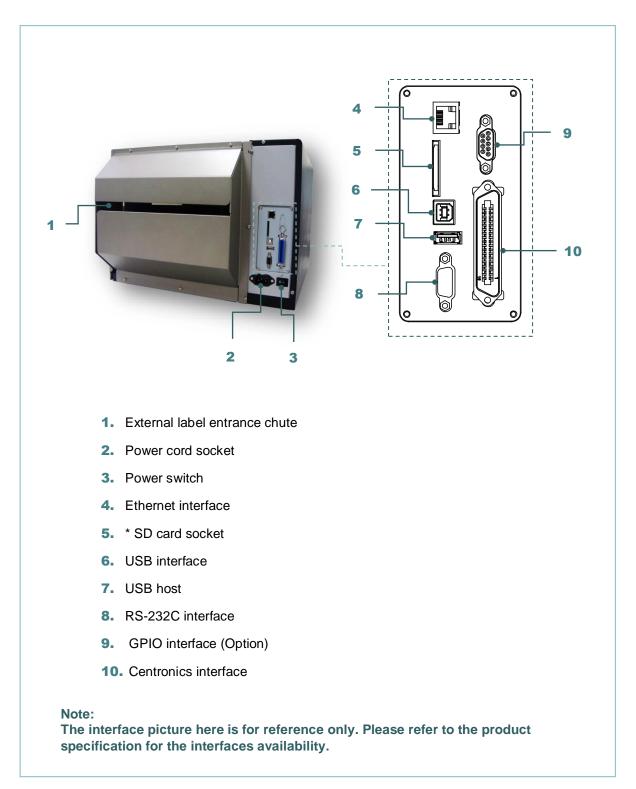

2.2.1 Front View

2.2.2 Interior view

2.2.3 Rear View

Туре	SD card spec	SD card capacity	Approved SD card manufacturer

3. Setup

3.1 Setting up the printer

- 1. Place the printer on a flat, secure surface.
- 2. Make sure the power switch is off.
- 3. Connect the printer to the computer with the provided USB cable.
- 4. Plug the power cord into the AC power cord socket at the rear of the printer, and then plug the power cord into a properly grounded power outlet.

Note: Please switch OFF printer power switch prior to plug in the power cord to printer power jack.

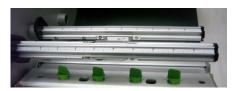

3.2 Loading the Ribbon

3.2.1 Loading the Ribbon

 Lift the handle to open the printer right side cover. Push the print head release lever to open the print head mechanism.

 Install the ribbon and paper core onto the ribbon supply spindle and ribbon rewind spindle. Make sure the ribbon & paper core are set at the center of the spindle. (You can refer to the ruler on the spindles.)

3. Thread the ribbon through the ribbon sensor slot and then through the open space in between print head and platen.

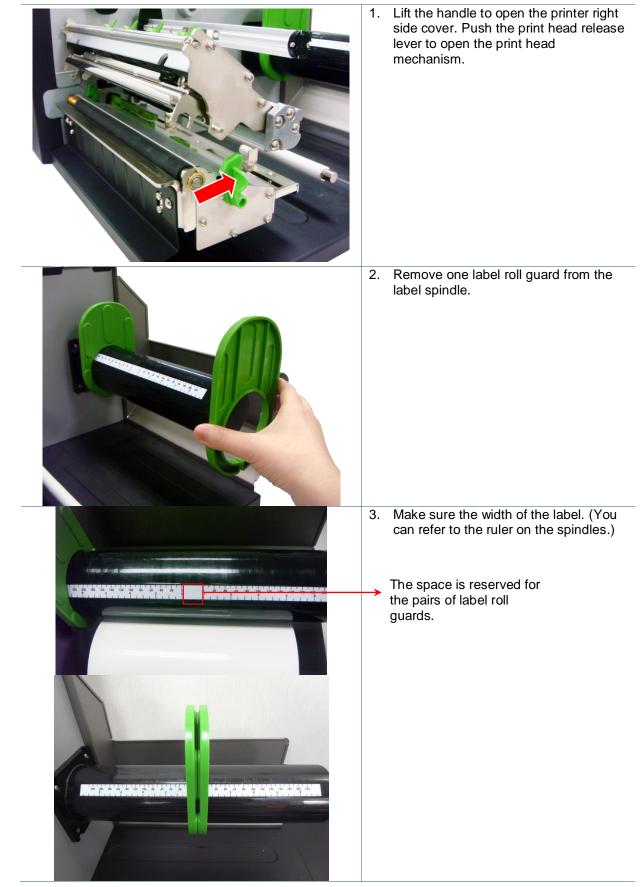

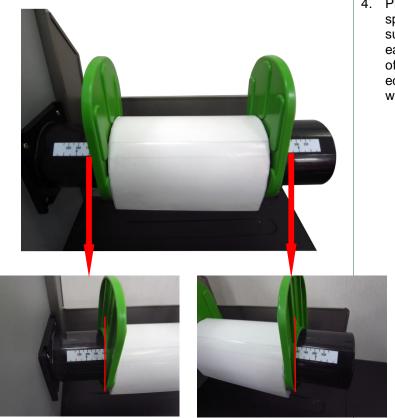

Loading path for ribbon

3.3 Loading the Media

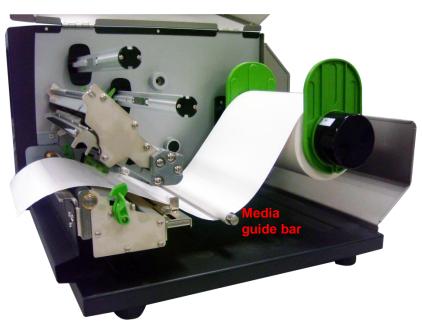

3.3.1 Loading Roll Labels

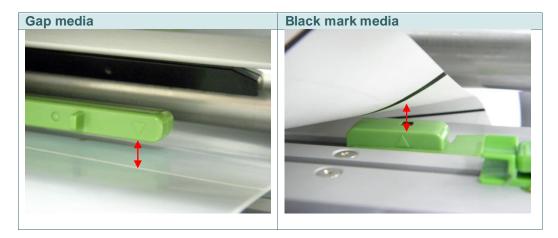

4. Place media roll on label supply spindle. Replace label roll guard. Make sure the label roll guard position of each sides are the same as the length of the label. Please check the outside edge scales are both close to the label width.

5. Pull label roll leading edge forward through the media guide bar, media sensor (green) and place the label leading edge onto the platen roller.

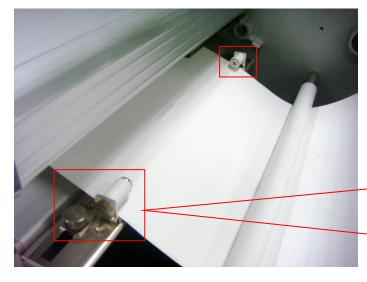

- 6. The media sensor position is moveable. Please make sure the gap or black mark is at the location where media gap/black mark will pass through for sensing.
 - Note:

* The sensor location is marked by a triangle mark abla at the sensor housing.

7. Loose the fixed screw to adjust the label guide to fit label width. Screw the fixed screw to lock the label guide.

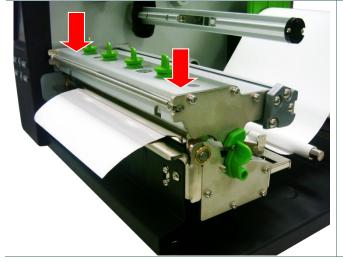

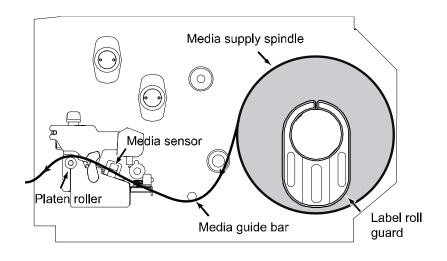

- 8. Close the print head mechanism. Make sure the latches are engaged securely.
- 9. Using the front display panel, set media sensor type and calibrate the selected sensor.

Note:

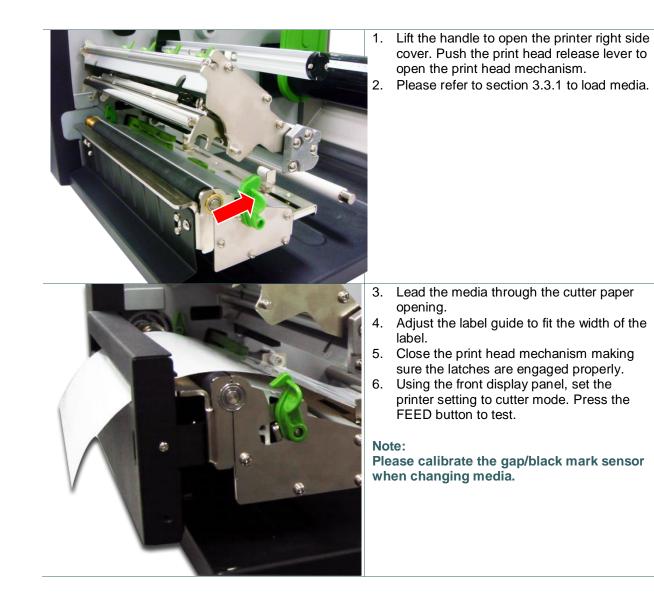

- * Please calibrate the gap/black mark sensor when changing media.
- * Please refer to video on <u>TSC</u> <u>YouTube</u> or driver CD.

Loading path for media

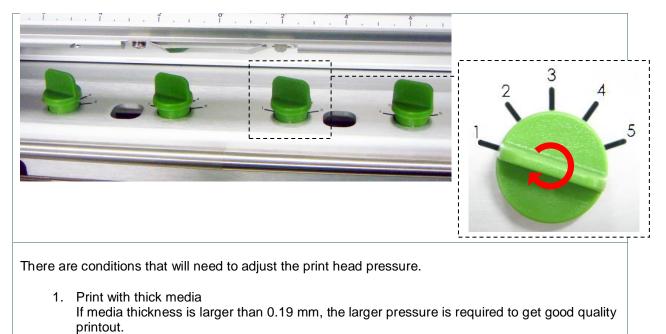

3.3.2 Loading Media in Cutter Mode (Option)

4. Adjustment Knob

4.1 Print Head Pressure Adjustment knob

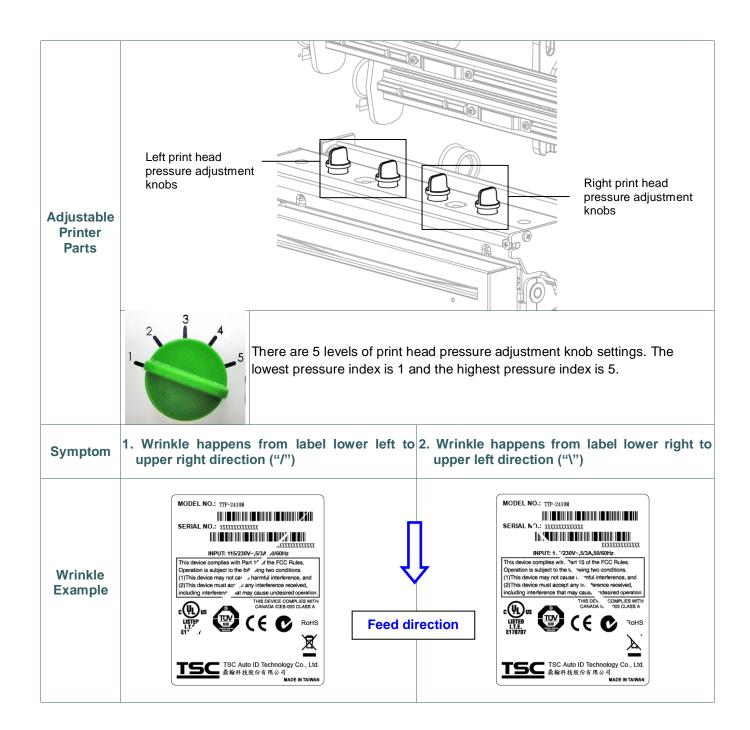

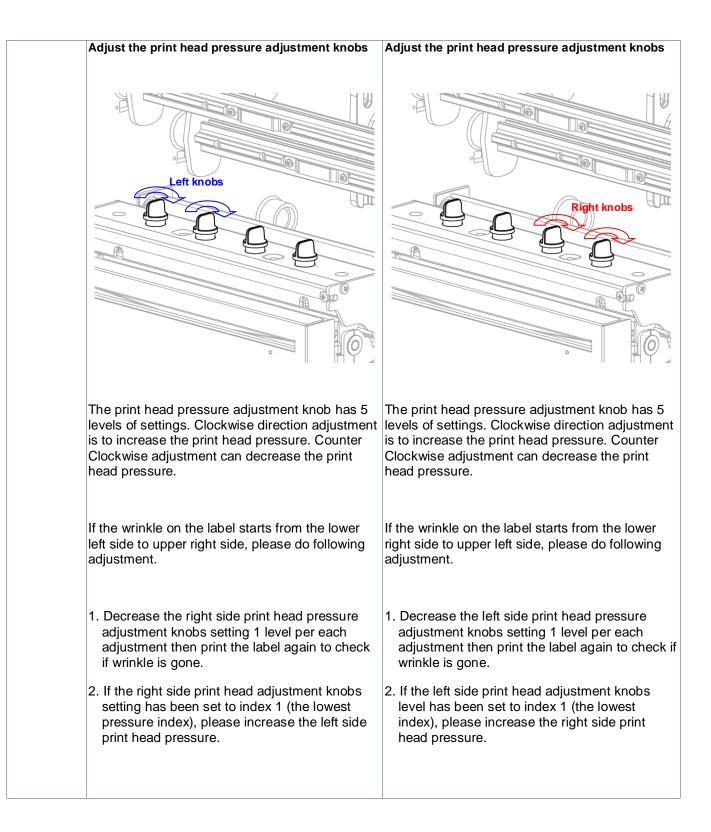

2. Ribbon wrinkle presented on the media

There are 5 levels of pressure for adjustment. Level 1 is the minimum pressure and level 5 is the maximum pressure. Please refer to next section for more information.

4.2 Mechanism Fine Adjustment to Avoid Ribbon Wrinkles

This printer has been fully tested before delivery. There should be no ribbon wrinkle presented on the media for general-purpose printing application. Ribbon wrinkle is related to the media thickness, print head pressure balance, ribbon film characteristics, print darkness setting...etc. In case the ribbon wrinkle happens, please follow the instructions below to adjust the printer parts.

5. LCD Menu Function

5.1 Enter the Main Menu

* By Keys:

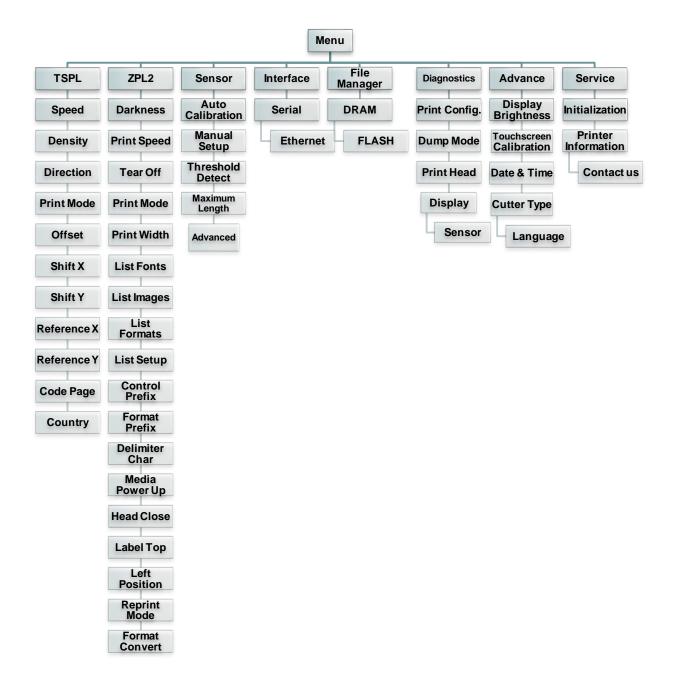

Press the "MENU" button and press the "SELECT" button to enter the main menu.

* By touch display:

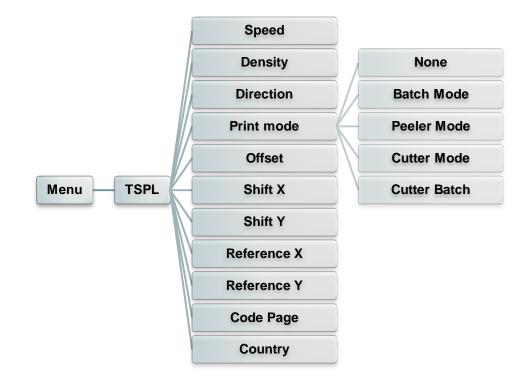

Tap the "Menu" icon on LCD to enter the main menu.

5.2 Main Menu Overview

There are 8 categories for the main menu. You can easy to set the settings of printer without connecting the computer. Please refer to following sections for more details.

5.3 TSPL2

This "TSPL2" category can set up the printer settings for TSPL2.

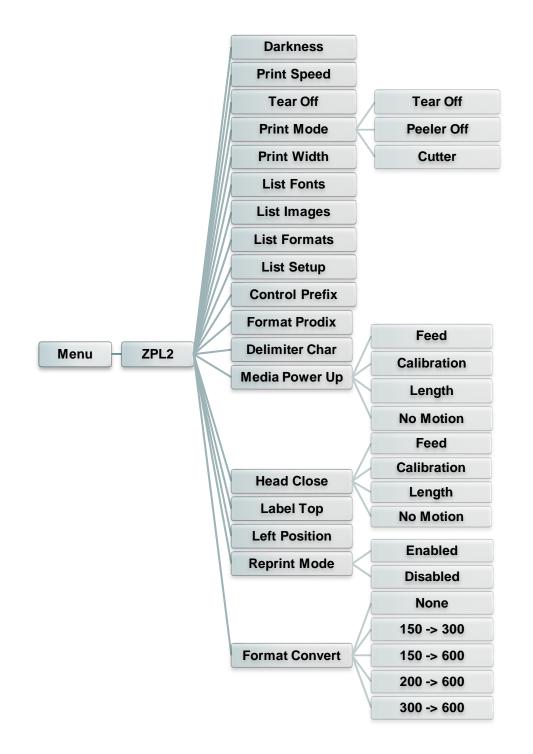

Item	Description		Default
Speed	Use this item to setup print speed. The each increase or decrease is 1 ips. Available setting is from 4 to 12.		6
Density	Use this option to setup printing darkness. The available setting is from 0 to 15, and the step is 1. You may need to adjust your density based on selected media.		8
Direction	The direction setting value is the printout direction. DIRECTION 0 Direction	DIRECTION 1	0
Print mode	below, Printer Mode Description None Next label to line location. Batch Mode Once image	print mode. There are 5 modes as p of form is aligned to the print head burn (Tear Off Mode) is printed completely, label gap/black fed to the tear plate location for tear	Batch Mode

	Peeler Mode Enable the label peel off mode.		
	Cutter Mode Enable the label cutter mode.		
	Cutter Batch	Cut the label once at the end of the printing job.	
Offset	This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9".		+000
Shift X	This item is used to fine tune print position. Available setting value is		+000
Shift Y	from "+" to "-" or "0" to "9".		+000
Reference X	This item is used to set the origin of printer coordinate system		000
Reference Y	horizontally and vertically. Available setting value is from "0" to "9".		000
Code page	Use this item to set the code page of international character set.		850
Country	Use this option t	Jse this option to set the country code.	

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the panel.

5.4 ZPL2

This "ZPL2" category can set up the printer settings for ZPL2.

Item	Description	Default
Darkness	Use this item to setup printing darkness. The available setting is from 0 to 30, and the step is 1. You may need to adjust your density based on selected media.	16

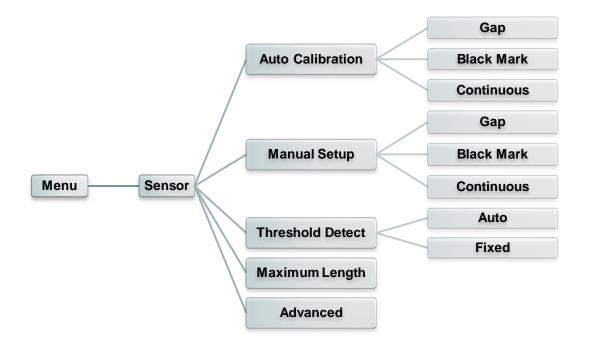

Print Speed	Use this item to setup print speed. The each increase or decrease is 1 ips. Available setting is from 1 to 6.	
Tear Off	This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9".	
Print mode	This item is used to set the print mode. There are 3 modes as below,Printer ModeDescriptionTear OffNext label top of form is aligned to the print head burn line location.Peeler OffEnable the label peel off mode. CutterCutterEnable the label cutter mode	
Print Width	This item is used to set print width. The available value is from "0" to "9".	812
List Fonts	This feature is used to print current printer available fonts list to the label. The fonts stored in the printer's DRAM, Flash or optional memory card.	N/A

Label Top	This option is used to adjust print position vertically on the label. The range is -120 to +120 dots.	
Left Position	This option is used to adjust print position horizontally on the label. The range is -9999 to +9999 dots.	

Reprint Mode	When reprint mode is enabled, you can reprint the last label printer by pressing ^(C) button on printer's control panel.	Disabled
Format Convert	Selects the bitmap scaling factor. The first number is the original dots per inch (dpi) value; the second, the dpi to which you would like to scale.	None

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the panel.

5.5 Sensor

This option is used to calibrate the selected sensor. We recommend calibrate the sensor before printing when changing the media.

Item	Description	Default
Auto Calibration	This option is used to set the media sensor type and calibrate the selected sensor automatically. Printer will feed 2 to 3 gap labels to calibrate the sensor sensitivity automatically.	N/A
Manual setup	In case "Automatic" cannot apply to the media, please use "Manual" function to set the paper length and gap/bline size then scan the backing/mark to calibrate the sensor sensitivity.	N/A
Threshold Detect	This option is used to set sensor sensitivity in fixed or auto.	Auto
Maximum Length	This option is used to set the maximum length for label calibration.	253 mm
Advanced	This function can set the minimum paper length and maximum gap/bline length for auto-calibrate the sensor sensitivity.	N/A

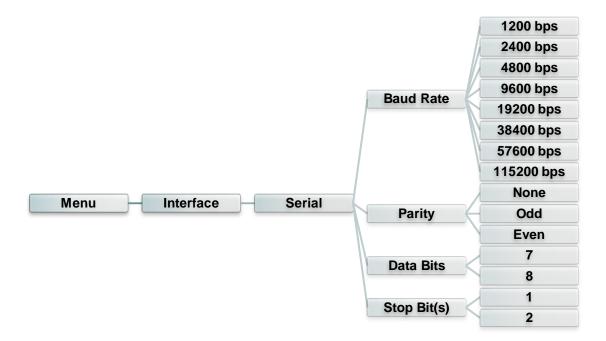

5.6 Interface

This option is used to set the printer interface settings.

5.6.1 Serial Comm.

This option is used to set the printer RS-232 settings.

Item	Description	Default
Baud Rate	This item is used to set the RS-232 baud rate.	9600
Parity	This item is used to set the RS-232 parity.	None
Data Bits	This item is used to set the RS-232 Data Bits.	8
Stop Bit(s)	This item is used to set the RS-232 Stop Bits.	1

5.6.2 Ethernet

Use this menu to configure internal Ethernet configuration check the printer's Ethernet

module status, and reset the Ethernet module.

ltem	Description	Default
Status	Use this menu to check the Ethernet IP address and MAC setting status.	N/A
DHCP	This item is used to ON or OFF the DHCP (Dynamic Host Configuration Protocol) network protocol.	N/A
Static IP	Use this menu to set the printer's IP address, subnet mask and gateway.	N/A

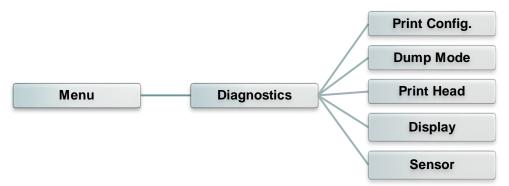

5.7 File Manager

This feature is used to check the printer available memory and file list.

Item	Description
DRAM	Use this menu to show, delete and run (.BAS) the files saved in the printer DRAM memory.
FLASH	Use this menu to show, delete and run (.BAS) the files saved in the printer Flash memory.

5.8 Diagnostics

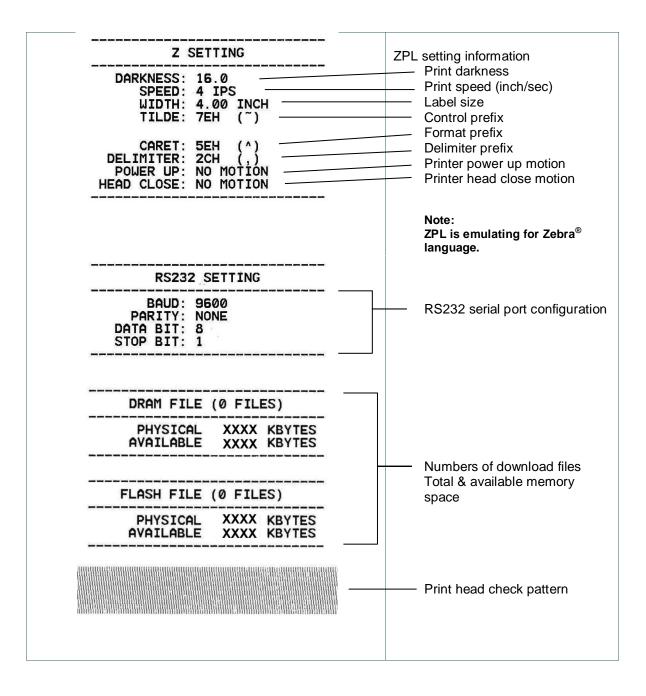

5.8.1 Print Config.

This feature is used to print current printer configuration to the label. On the configuration printout, there is a print head test pattern, which is useful for checking if there is any dot damage on the print head heater element.

Menu	Diagnostics	Print Config.

SYSTEM INFORMA	TION	Model name
MODEL: XXXXXX FIRMWARE: X.XX CHECKSUM: XXXXXX S/N: XXXXXX TCF: NO DATE: 1970/0 TIME: 00:04: NON-RESET: 110 RESET: 110 NON-RESET: 0 RESET: 0	XX XXXXX 1/01	 F/W version Firmware checksum Printer S/N TSC configuration file System date System time Printed mileage (meter) Cutting counter
PRINTING SETT	ING	
HEIGHT: 4.00 I		 Print speed (inch/sec) Print darkness Label size (inch) Gap distance (inch) Gap/black mark sensor intension Code page

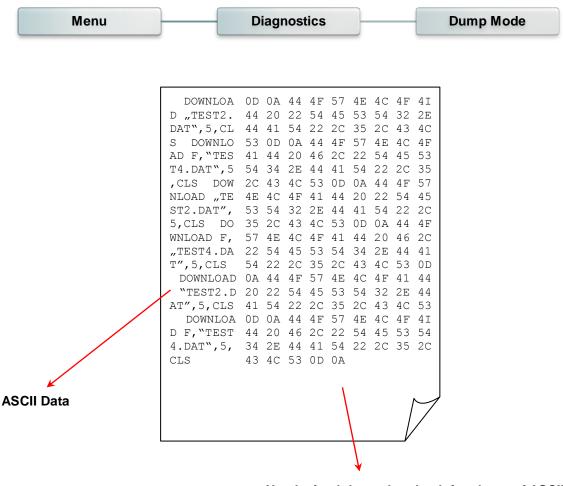

Note:

Checking dot damage requires 6" wide paper width.

5.8.2 Dump Mode

Captures the data from the communications port and prints out the data received by printer. In the dump mode, all characters will be printed in 2 columns. The left side characters are received from your system and right side data are the corresponding hexadecimal value of the characters. It allows users or engineers to verify and debug the program.

Hexdecimal data related to left column of ASCII data

5.8.3 Print Head

This feature can check the temperature, resistance and bad dots for print head.

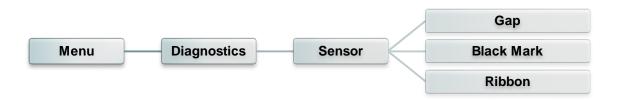

5.8.4 Display

This feature can check the display for printer.

Menu	Diagnostics	Display

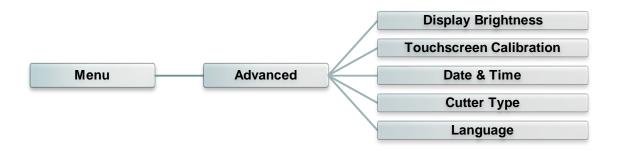

5.8.5 Sensor

This feature can check the intension & reading values for printer sensors.

5.9 Advanced

This feature is used to set the printer advanced settings.

ltem	Description
Display Brightness	This item is used to setup the brightness for display.
Touchscreen Calibration	This item is used to calibrate the center of the cross for best result for touchscreen.
Date & Time	This item is used to setup the date and time on display.
Cutter Type	This item is used to set the cutter type.
Language	This item is used to setup the language on display.

5.10 Service

This feature is used to restore printer settings to defaults and checking information for printer.

Item	Description
Initialization	This feature is used to restore printer settings to defaults.
Printer Information	This feature is used to check printer serial number, printed mileage(m), labels(pcs.) and cutting counter.
Contact us	This feature is used to check the contact information for tech support service

6. Diagnostic Tool

TSC's Diagnostic Utility is an integrated tool incorporating features that enable you to explore a printer's settings/status; change a printer's settings; download graphics, fonts and firmware; create a printer bitmap font; and send additional commands to a printer. With the aid of this powerful tool, you can review printer status and setting in an instant, which makes it much easier to troubleshoot problems and other issues.

6.1 Start the Diagnostic Tool

1. Double click on the Diagnostic tool icon

DiagTool.exe to

to start the software.

2. There are four features (Printer Configuration, File Manager, Bitmap Font Manager, Command Tool) included in the Diagnostic utility.

Features tab	Diagnostic Tool 1.63 Language English	Unit inch Omm		USB		Setup

6.2 Printer Function

- 1. Connect the printer and computer with a cable.
- 2. Select the PC interface connected with bar code printer.

USB cable	Other cable
USB Setup	COM Setup 2
The default interface setting is USB interface. If USB interface is connected with printer, no other settings need to be changed in the interface field.	LPT ETHERNET

- 3. Click the "Printer Function" button to setup.
- 4. The detail functions in the Printer Function Group are listed as below.

Printer Function	Function	Description
Calibrate Sensor	Calibrate Sensor	Calibrate the sensor specified in the Printer Setup group media sensor field
Ethernet Setup	Ethernet Setup	Setup the IP address, subnet mask, gateway for the on board Ethernet
RTC Setup	RTC Setup	Synchronize printer Real Time Clock with PC
Factory Default	Factory Default	Initialize the printer and restore the settings to factory default.
Reset Printer	Reset Printer	Reboot printer
Print Test Page	Print Test Page	Print a test page
Configuration Page	Configuration Page	Print printer configuration
Dump Text	Dump Text	To activate the printer dump mode.
Ignore AUTO.BAS	Ignore AUTO.BAS	Ignore the downloaded AUTO.BAS program
Exit Line Mode	Exit Line Mode	Exit line mode.
Password Setup	Password Setup	Set the password to protect the settings

For more information about Diagnostic Tool, please refer to the diagnostic utility quick start guide in the CD disk \ Utilities directory.

6.3 Setting Ethernet by Diagnostic Tool

The Diagnostic Utility is enclosed in the CD disk \Utilities directory. Users can use Diagnostic Tool to setup the Ethernet by RS-232, USB and Ethernet interfaces. The following contents will instruct users how to configure the Ethernet by these three interfaces.

6.3.1 Using USB interface to setup Ethernet interface

- 1. Connect the printer and computer with USB cable.
- 2. Turn on the printer power switch.
- 3. Start the Diagnostic Utility by double clicking on the
- 📑 DiagToolexe icon.
- 4. The Diagnostic Utility default interface setting is USB interface. If USB interface is connected with printer, no other settings need to be changed in the interface field.

Interface	
USB 🗨	Setup
USB COM	
LPT ETHERNET	

5. Click on the "Ethernet Setup" button from "Printer Function" group in Printer Configuration tab to setup the IP address, subnet mask and gateway for the on board Ethernet.

	🖨 Ethernet Setup 🔀		
Printer Function Calibrate Sensor	IP Setup © DHCP © Static IP		
Ethernet Setup	IP 255.255.255		
RTC Setup	Subnet Mask 255.255.255		
Print Test Page	Giateway 255.255.255		
Reset Printer	Printer Name PS-FF04E2		
Factory Default	MAC Address 00-1B-82-FF-04-E2		
Dump Text			
Ignore AUTO.BAS			
Configuration Page	Set Printer Name Set IP Cancel		

6.3.2 Using RS-232 interface to setup Ethernet interface

- 1. Connect the computer and the printer with a RS-232 cable.
- 2. Turn on the printer power.
- 3. Start the Diagnostic Utility by double clicks on the

Configuration Page	MAC Address 00-1B-82-FF-04-E2
	Set Printer Name Set IP Cancel

6.3.3 Using Ethernet interface to setup Ethernet interface

- 1. Connect the computer and the printer to the LAN.
- 2. Turn on the printer power.
- 3. Start the Diagnostic Utility by double clicks on the

4. Select "Ethernet" as the interface then click on the "Setup" button to setup the IP address, subnet mask and gateway for the on board Ethernet.

ETHERNET Setup	🖨 TCP/IP Set	1D			_	
USB COM LPT ETHERNET	Printer Name 11033-50 PS-C76790	MAC 00:18:82:FF:02:0C 00:18:11:C7:67:90	IP Address 10.0.6.125 10.0.6.24	Model Name TT033-50 DP-G321	Status Ready Ready	IP Setting IP Address/Printer Name: 10.0.6.125 Port: 9100
	Discover Devi	ce Change IP Addre	Factory Defa	ault Web Se	etup	Exit

- 5. Click the "Discover Device" button to explore the printers that exist on the network.
- 6. Select the printer in the left side of listed printers, the correspondent IP address will be shown in the right side "IP address/Printer Name" field.
- 7. Click "Change IP Address" to configure the IP address obtained by DHCP or static.

🖨 Ethernet S	Setup (×
IP Setup © DHCP © Static IP		
IP	10.0.6.125	
Subnet Mask	255.255.255.0	
Gateway	10.0.6.253	
Printer Name	TT033-50	
MAC Address	00:1B:82:FF:02:0C	
Set Printer Na	ame Set IP Cancel	

The default IP address is obtained by DHCP. To change the setting to static IP address, click "Static IP" radio button then enter the IP address, subnet mask and gateway. Click "Set IP" to take effect the settings.

Users can also change the "Printer Name" by another model name in this fields then click "Set Printer Name" to take effect this change.

Note: After clicking the "Set Printer Name" or "Set IP" button, printer will reset to take effect the settings.

8. Click "Exit" button to exit the Ethernet interface setup and go back to Diagnostic Tool main screen.

Factory Default button

This function will reset the IP, subnet mask, gateway parameters obtained by DHCP and reset the printer name.

Web setup button

Except to use the Diagnostic Utility to setup the printer, you can also explore and configure the printer settings and status or update the firmware with the IE or Firefox web browser. This feature provides a user friendly setup interface and the capability to manage the printer remotely over a network.

7. Troubleshooting

The following guide lists the most common problems that may be encountered when operating this bar code printer. If the printer still does not function after all suggested solutions have been invoked, please contact the Customer Service Department of your purchased reseller or distributor for assistance.

Problem	Possible Cause	Recovery Procedure
Power indicator does not illuminate	* The power cord is not properly connected.	* Plug the power cord in printer and outlet.* Switch the printer on.
Carriage Open	* The printer carriages are open.	* Please close the print carriages.
Not Printing	 * Check if interface cable is well connected to the interface connector. * Check if wireless or Bluetooth device is well connected between host and printer. * The port specified in the Windows driver is not correct. 	 Printhead's namess connector is not well connected with printheat. Turn off the printer and plug the connector again. * Check your program if there is a command PRINT at the end of the file and there must have CRLF at the end of each command line.
No print on the label	 * Label or ribbon is loaded not correctly. * Use wrong type paper or ribbon 	 * Follow the instructions in loading the media and ribbon. * Ribbon and media are not compatible. * Verify the ribbon-inked side. * Reload the ribbon again. * Clean the printhead. * The print density setting is incorrect.
No Ribbon	 * Running out of ribbon. * The ribbon is installed incorrectly. 	 * Supply a new ribbon roll. * Please refer to the steps in user's manual to reinstall the ribbon.
No Paper	 * Running out of label. * The label is installed incorrectly. * Gap/black mark sensor is not calibrated. 	 * Supply a new label roll. * Please refer to the steps in user's manual to reinstall the label roll. * Calibrate the gap/black mark sensor.
Paper Jam	 * Gap/black mark sensor is not set properly. * Make sure label size is set properly. * Labels may be stuck inside the printer mechanism. 	 * Calibrate the media sensor. * Set media size correctly. * Remove the stuck label inside the printer mechanism.
Can't downloading the file to memory (FLASH / DRAM/CARD)	* The space of memory is full.	* Delete unused files in the memory.
SD card is unable to use	 * SD card is damaged. * SD card doesn't insert correctly. * Use the non-approved SD card manufacturer. 	 * Use the supported capacity SD card. * Insert the SD card again. * The supported SD card spec and the approved SD card manufacturers, please refer to section 2.2.3.

Poor Print Quality	 * Ribbon and media is loaded incorrectly. * Dust or adhesive accumulation on the print head. * Print density is not set properly. * Printhead element is damaged. * Ribbon and media are incompatible. * The printhead pressure is not set properly. 	 * Reload the supply. * Clean the print head. * Clean the platen roller. * Adjust the print density and print speed. * Run printer self-test and check the print head test pattern if there is dot missing in the pattern. * Change proper ribbon or proper label media. * Adjust the printhead pressure adjustment knob. * The release lever does not latch the printhead properly.
Missing printing on the left or right side of label	* Wrong label size setup.	* Set the correct label size.
Gray line on the blank label	* The print head is dirty.* The platen roller is dirty.	* Clean the print head.* Clean the platen roller.
Irregular printing	 * The printer is in Hex Dump mode. * The RS-232 setting is incorrect. 	 * Turn off and on the printer to skip the dump mode. * Re-set the Rs-232 setting.
Label feeding is not stable (skew) when printing	* The media guide does not touch the edge of the media.	* Adjust the media guide then lock it.
Skip labels when printing	 * Label size is not specified properly. * Sensor sensitivity is not set properly. * The media sensor is covered with dust. 	 * Check if label size is setup correctly. * Calibrate the sensor by Auto Gap or Manual Gap options. * Clear the GAP/Black mark sensor by blower.
Wrinkle Problem	 * Printhead pressure is incorrect. * Ribbon installation is incorrect. * Media installation is incorrect. * Print density is incorrect. * Media feeding is incorrect. * Print with thick media 	 * Please refer to section 4.2. * Please set the suitable density to have good print quality. * Make sure the label guide touch the edge of the media guide.
RTC time is incorrect when reboot the printer	* The battery has run down.	* Check if there is a battery on the main board.
The left side printout position s incorrect * Wrong label size setup. * The parameter Shift X in LCD menu is incorrect.		 * Set the correct label size. * Press [MENU] → [SELECT] x 3 → [DOWN] x 5 → [SELECT] to fine tune the parameter of Shift X.

The printing position of small label is incorrect	 * Media sensor sensitivity is not set properly. * Label size is incorrect. * The parameter Shift Y in the LCD menu is incorrect. * The vertical offset setting in the driver is incorrect. 	Media Handling	
LCD panel is dark and keys are not working	* The cable between main PCB and LCD panel is loose.	* Check if the cable between main PCB and LCD is secured or not.	
LCD panel is dark but the LEDs are light	 * The printer initialization is unsuccessful. 	 * Turn OFF and ON the printer again. * Initialize the printer. 	
LCD panel is dark and LEDs are lit on, but the label is feeding forward	* The LCD panel harness connector is loose.	* The LCD panel harness connector is plugged upside down.	
Ribbon encoder sensor doesn't work	* The ribbon encoder sensor connector is loose.	* Fasten the connector.	
Ribbon end sensor doesn't work	 * The connector is loose. * The ribbon sensor hole is covered with dust. 	 * Check the connector. * Clear the dust in the sensor hole by the blower. 	
Cutter is not working	* The connector is loose.	* Plug in the connect cable correctly.	
Power and Error LEDs are blinking fast	* Power switch OFF and ON too fast.	* Turn off the printer and wait all LEDs are dark, and turn on the printer again.	

8. Maintenance

This session presents the clean tools and methods to maintain your printer.

- 1. Please use one of following material to clean the printer.
 - Cotton swab
 - Lint-free cloth
 - Vacuum / Blower brush
 - 100% Ethanol or Isopropyl Alcohol
- 2. The cleaning process is described as following,

Printer Part	Method	Interval	
	 Always turn off the printer before cleaning the print head. Allow the print head to cool for a minimum of one minute. Use a cotton swab and 100% Ethanol or Isopropyl Alcohol to clean the print head surface. 	Clean the print head when changing a new label roll.	
		Print Head	
Print Head	Print Head Element Head Cleaner Pen	Element	
Platen Roller	 Turn the power off. Rotate the platen roller and wipe it thoroughly with water. 	Clean the platen roller when changing a new label roll	
Peel Bar	Use the lint-free cloth with 100% ethanol As needed to wipe it.		
Sensor	Compressed air or vacuum	Monthly	
Exterior	Wipe it with water-dampened cloth As needed		
Interior	Brush or vacuum As needed		

Note:

- Do not touch printer head by hand. If you touch it careless, please use ethanol to clean it.
- Please use 100% Ethenol or Isopropyl Alcohol. DO NOT use medical alcohol, which may damage the printer head.
- Regularly clean the print head and supply sensors once change a new media to keep printer performance and extend printer life.

9. Repacking Instructions

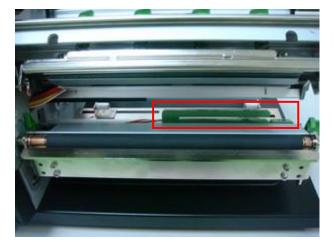

Read these instructions completely before you begin work. Gather the tools you will need before beginning. Perform all the steps in this document in the order listed; do not add or omit any, as doing so could potentially damage the Printer.

9.1 Materials and Tools Needed

- 1. Paper core (for ribbon spindle)
- 2. Masking tape
- 3. Clear packing tape

9.2 Repacking the Printer

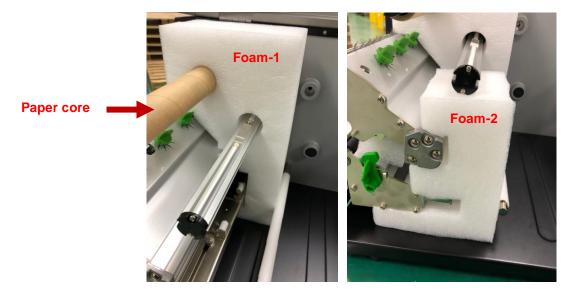

- 1. Set the printer power switch to O (Off).
- 2. Unplug the printer power cord from the printer and the AC power source.
- 3. Disconnect the data signal cable(s) from the printer interface(s).
- 4. Remove and retain the media and ribbon.
- 5. Make sure the sensor modules are pushed to the right side.

6. Insert the foam between the printhead and the platen as shown.

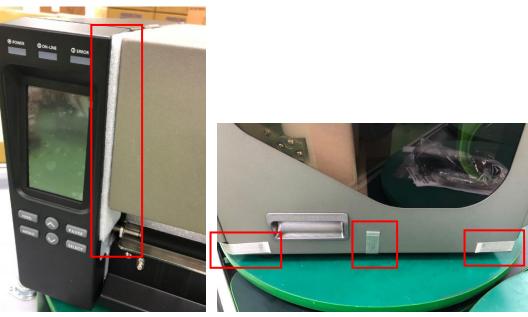

7. Insert the foams into the printer as shown. Install the paper core into the ribbon rewind spindle.

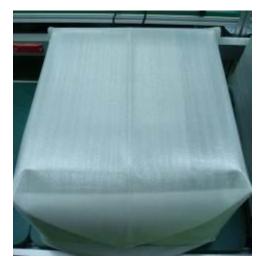

8. Make sure the media guides are pushed in the middle.

 Close the media cover. Insert the foam between the LCD module and the media cover as shown. Apply three pieces of masking tape, each 12 cm long, to the lower edge of the media cover as shown.

10. Place the bag over the printer. Fold the bag and seal it with clear packing tape as shown.

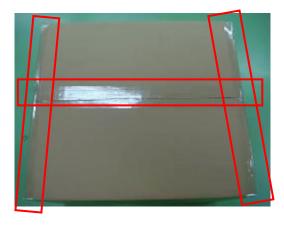

11. Install the front cap and the rear cap as shown.

12. Place it into the box. Place the printer accessories into the box.

13. Close the four flaps and seal the box with clear packing tape.
